

KOLEJ MATRIKULASI PERAK

DC014 SAINS KOMPUTER SKEMA PRAPSPM SESI 2023/2024

Questions No	Answers	Marks
1(a)	Audio - Audio is the use of speech, music and sound effects. - Produced by vibration, as perceived by the sense of hearing. Graphic - A digital representation of non-text information Animation - Animation is a process of making a static image look like it is moving. - Animation is a series of graphical images displayed one after another to simulate movement. Text - Combination of letters that form a word or sentence that describe a topic which is known as text information. - Text is a basic element of multimedia that combine alphabets, numbers and symbol Video - Video is a series of frames containing pictures and sound played back at a fast rate. Video is a product of recording moving visual images by using a camera or video machine.	J2 1m - element 1m - explain <i>Select any one (1) answer</i>

1(b)	<table><tr><th>Element</th><th>Explanation</th></tr><tr><td>Audio</td><td> • To capture attention: a sound in a multimedia presentation will capture an audience's attention. • To increase the associations the end-users make with the information in their mind (sound of a duck), thus increasing their retention rate. • Audio adds an exciting dimension to a presentation. </td></tr><tr><td>Graphic</td><td> • Convey information more quickly than when using text. • Make complex information easy to understand. • To present information more attractively. • To illustrate ideas through still pictures. • Images - used to add emphasis, direct attention, illustrate concepts and provide background content. • Complementary element - used as background and texture. </td></tr><tr><td>Animation</td><td> • Animation is useful for illustrating concepts which involve movement. • Can help organize thoughts and illustrate processes. • Can graphically simplify complicated concepts and convey complex inter-relationships, which are difficult to visualize. • Inject humor and light-heartedness in a presentation via an animated cartoon. • Can attract audience attention </td></tr><tr><td>Text</td><td> • Effective for conveying basic/fundamental information </td></tr><tr><td>Graphic</td><td> • Videos engage students of all ages and abilities • Videos motivate with authentic content • Videos provide concept/context/real situation to help understanding. </td></tr></table>	Element	Explanation	Audio	• To capture attention: a sound in a multimedia presentation will capture an audience's attention. • To increase the associations the end-users make with the information in their mind (sound of a duck), thus increasing their retention rate. • Audio adds an exciting dimension to a presentation.	Graphic	• Convey information more quickly than when using text. • Make complex information easy to understand. • To present information more attractively. • To illustrate ideas through still pictures. • Images - used to add emphasis, direct attention, illustrate concepts and provide background content. • Complementary element - used as background and texture.	Animation	• Animation is useful for illustrating concepts which involve movement. • Can help organize thoughts and illustrate processes. • Can graphically simplify complicated concepts and convey complex inter-relationships, which are difficult to visualize. • Inject humor and light-heartedness in a presentation via an animated cartoon. • Can attract audience attention	Text	• Effective for conveying basic/fundamental information	Graphic	• Videos engage students of all ages and abilities • Videos motivate with authentic content • Videos provide concept/context/real situation to help understanding.	J2 1m - keyword 1m - explain Select any one (1) answer
Element	Explanation													
Audio	• To capture attention: a sound in a multimedia presentation will capture an audience's attention. • To increase the associations the end-users make with the information in their mind (sound of a duck), thus increasing their retention rate. • Audio adds an exciting dimension to a presentation.													
Graphic	• Convey information more quickly than when using text. • Make complex information easy to understand. • To present information more attractively. • To illustrate ideas through still pictures. • Images - used to add emphasis, direct attention, illustrate concepts and provide background content. • Complementary element - used as background and texture.													
Animation	• Animation is useful for illustrating concepts which involve movement. • Can help organize thoughts and illustrate processes. • Can graphically simplify complicated concepts and convey complex inter-relationships, which are difficult to visualize. • Inject humor and light-heartedness in a presentation via an animated cartoon. • Can attract audience attention													
Text	• Effective for conveying basic/fundamental information													
Graphic	• Videos engage students of all ages and abilities • Videos motivate with authentic content • Videos provide concept/context/real situation to help understanding.													
1(c)	High quality and detail: Bitmap images can store a large amount of information, which means that they can produce very high quality and detailed images. This is especially important for photographs and other images with subtle shading and colour variations. Wide range of colours and gradients: Bitmap images can capture a wide range of colours and gradients, which makes them ideal for displaying realistic images. Easy to edit: Bitmap images are relatively easy to edit, using a variety of software applications. Widely supported: Bitmap images are widely supported by most hardware and software devices. @any suitable answer	J2 1m - keyword 1m - explain Select any one (1) answer												

2(a)(i)	<table> <tr> <td>Shape</td> <td></td> <td></td> </tr> <tr> <td>Axis</td> <td>x, y, z</td> <td>x, y</td> </tr> <tr> <td>Dimension</td> <td>length, width, height</td> <td>length, width,</td> </tr> </table>	Shape			Axis	x, y, z	x, y	Dimension	length, width, height	length, width,	J2 0.5m each cell
Shape											
Axis	x, y, z	x, y									
Dimension	length, width, height	length, width,									
(a)(ii)	Tend to be larger than traditional multimedia representations, due to the additional dimension of data <i>@ any suitable answer</i>	J2									
2(b)(i)	Phase: Production Activity: Authoring	J1 J1									
2(b)(ii)	Phase: Post-Production Activity: Testing	J1 J1									
2(b)(iii)	Phase: Pre-Production Activity: Storyboards	J1 J1									
2(c)	<table> <tr> <th>Type of Authoring Tool</th> <th>Characteristic</th> </tr> <tr> <td>Card/Page-Based</td> <td> - allow designers to arrange elements as pages of a book or a stack of a card - OR - using a card stack metaphor </td> </tr> <tr> <td>Time-Based</td> <td> - allow designers to arrange elements and events of the multimedia project along a well-defined timeline - OR - using a movie metaphor </td> </tr> </table>	Type of Authoring Tool	Characteristic	Card/Page-Based	- allow designers to arrange elements as pages of a book or a stack of a card - OR - using a card stack metaphor	Time-Based	- allow designers to arrange elements and events of the multimedia project along a well-defined timeline - OR - using a movie metaphor	J2 J2			
Type of Authoring Tool	Characteristic										
Card/Page-Based	- allow designers to arrange elements as pages of a book or a stack of a card - OR - using a card stack metaphor										
Time-Based	- allow designers to arrange elements and events of the multimedia project along a well-defined timeline - OR - using a movie metaphor										
2(d)	<table> <tr> <th>Content <i>Kandungan</i></th> <th>Accessibility <i>Kebolehcapaian</i></th> </tr> <tr> <td>Can be changed and updated at any time by the developer</td> <td>Require broadband Internet connection</td> </tr> </table>	Content <i>Kandungan</i>	Accessibility <i>Kebolehcapaian</i>	Can be changed and updated at any time by the developer	Require broadband Internet connection	J1+J1					
Content <i>Kandungan</i>	Accessibility <i>Kebolehcapaian</i>										
Can be changed and updated at any time by the developer	Require broadband Internet connection										
3(a)	File processing system	J1									

3(b)	Data redundancy because data is repeated / occurs/ appears multiple times in each department OR Data Isolation Data is difficult to access by othe user from other department because data are kept in saperete files in separate department.	J2 <i>Select any one (1) answer</i>
3(c)(i)	Database system	J1
3(c)(ii)	• Expensive @ difficult to setup @ maintain • Requires Skills @ Knowledge • Expensive @ difficult @ time consuming to convert to database system • Needs huge storage • Vulnerable to failure eg: natural disaster @ blackouts <i>Any acceptable answer</i>	J2 <i>Select any one (1) answer</i>
4(a)	• data accuracy @ accuracy - dpd buku amran • data consistency @ consistency - dpd buku amran • data completeness • data timelessness • data compliance	J2 <i>Select any two (2) answer</i>
4(b)	Form Report	J1 J1
5(a)	Telemedicine is the delivery of healthcare services remotely, using telecommunications technology. It enables the transmission of medical data, such as images, videos, and patient records, between healthcare professionals and patients. @ <i>any suitable answer</i>	J2
5(b)	The Global Positioning System (GPS) is a satellite-based navigation system that provides location and time information to users around the world. @<i>any suitable answer</i>	J2

5(c)	<table> <tr> <th>Usage</th> <th>Type of wired transmission media</th> </tr> <tr> <td>Commonly used for a network such as a computer laboratory.</td> <td>twisted pair cable</td> </tr> <tr> <td>Can support higher data rates and longer distances and is commonly used in cable television networks.</td> <td>coaxial cable</td> </tr> <tr> <td>Offers the highest data rates and longest distances and commonly used long-distance communication</td> <td>fiber optic cable</td> </tr> <tr> <td>Relatively inexpensive and easy to install, which makes it ideal for a variety of applications such as in telephone networks.</td> <td>twisted pair cable</td> </tr> </table>	Usage	Type of wired transmission media	Commonly used for a network such as a computer laboratory.	twisted pair cable	Can support higher data rates and longer distances and is commonly used in cable television networks.	coaxial cable	Offers the highest data rates and longest distances and commonly used long-distance communication	fiber optic cable	Relatively inexpensive and easy to install, which makes it ideal for a variety of applications such as in telephone networks.	twisted pair cable	J4 1m each				
Usage	Type of wired transmission media															
Commonly used for a network such as a computer laboratory.	twisted pair cable															
Can support higher data rates and longer distances and is commonly used in cable television networks.	coaxial cable															
Offers the highest data rates and longest distances and commonly used long-distance communication	fiber optic cable															
Relatively inexpensive and easy to install, which makes it ideal for a variety of applications such as in telephone networks.	twisted pair cable															
5(d)	<table> <tr> <th>Characteristics</th> <th>Type of wireless transmission media</th> </tr> <tr> <td>The longest wavelength on the electromagnetic spectrum, and they can travel long distances through air and penetrate obstacles.</td> <td>radio wave</td> </tr> <tr> <td>They are commonly used for satellite communications and cellular telephone networks.</td> <td>microwave / cellular radio</td> </tr> <tr> <td>It is commonly used for short-range communication between devices such as remote controls.</td> <td>infrared</td> </tr> <tr> <td>Bluetooth is a short-range wireless technology that connects devices such as smartphones, headphones, and speakers.</td> <td>radio wave</td> </tr> </table>	Characteristics	Type of wireless transmission media	The longest wavelength on the electromagnetic spectrum, and they can travel long distances through air and penetrate obstacles.	radio wave	They are commonly used for satellite communications and cellular telephone networks.	microwave / cellular radio	It is commonly used for short-range communication between devices such as remote controls.	infrared	Bluetooth is a short-range wireless technology that connects devices such as smartphones, headphones, and speakers.	radio wave	J4 1m each				
Characteristics	Type of wireless transmission media															
The longest wavelength on the electromagnetic spectrum, and they can travel long distances through air and penetrate obstacles.	radio wave															
They are commonly used for satellite communications and cellular telephone networks.	microwave / cellular radio															
It is commonly used for short-range communication between devices such as remote controls.	infrared															
Bluetooth is a short-range wireless technology that connects devices such as smartphones, headphones, and speakers.	radio wave															
5(e)	<table> <tr> <th>Function</th> <th>Communication device</th> </tr> <tr> <td>Connects devices on the same network and sends all data packets to all connected devices.</td> <td>hub</td> </tr> <tr> <td>Converts digital signals from a computer into analog signals that can be transmitted over a telephone line or other communication channel.</td> <td>modem</td> </tr> <tr> <td>Allows devices to connect to a network wirelessly.</td> <td>wireless access point(WAP)</td> </tr> <tr> <td>Allows a device to connect to a network.</td> <td>network interface card (NIC)</td> </tr> <tr> <td>Extends the range of a network signal.</td> <td>repeater</td> </tr> <tr> <td>Connects different networks together and forwards data packets to their destination.</td> <td>router</td> </tr> </table>	Function	Communication device	Connects devices on the same network and sends all data packets to all connected devices.	hub	Converts digital signals from a computer into analog signals that can be transmitted over a telephone line or other communication channel.	modem	Allows devices to connect to a network wirelessly.	wireless access point(WAP)	Allows a device to connect to a network.	network interface card (NIC)	Extends the range of a network signal.	repeater	Connects different networks together and forwards data packets to their destination.	router	J6 1m each
Function	Communication device															
Connects devices on the same network and sends all data packets to all connected devices.	hub															
Converts digital signals from a computer into analog signals that can be transmitted over a telephone line or other communication channel.	modem															
Allows devices to connect to a network wirelessly.	wireless access point(WAP)															
Allows a device to connect to a network.	network interface card (NIC)															
Extends the range of a network signal.	repeater															
Connects different networks together and forwards data packets to their destination.	router															

6(a)	Subject directory / directory search A subject directory provides categorized lists of links arranged by subject.	J1 J1										
6(b)(i)	Operator : space or + Display hits that include specific words	J1 J1										
6(b)(ii)	<table><tr><td>OR</td><td>Display hits that include only one word from a list</td></tr><tr><td>()</td><td>Combine hits that include specific words with those that include only one word from a list</td></tr><tr><td>-</td><td>Exclude a word from the search results</td></tr><tr><td>“ ”</td><td>Search for an exact phrase in a certain order</td></tr><tr><td>*</td><td>Substitute characters in place of the asterisk</td></tr></table>	OR	Display hits that include only one word from a list	()	Combine hits that include specific words with those that include only one word from a list	-	Exclude a word from the search results	“ ”	Search for an exact phrase in a certain order	*	Substitute characters in place of the asterisk	J1+J1 J1+J1 J1+J1 J1+J1 J1+J1 <i>Select any one (1) answer</i>
OR	Display hits that include only one word from a list											
()	Combine hits that include specific words with those that include only one word from a list											
-	Exclude a word from the search results											
“ ”	Search for an exact phrase in a certain order											
*	Substitute characters in place of the asterisk											
6(c)(i)	<table><tr><th>Examples of Social Media</th><th>Descriptions</th></tr><tr><td></td><td> - Relates who your audience is and the relationships you have with them OR - Discussion and building the relationships OR - Involves two way communications OR - Specific audiences / a number of people in the group OR - Enhances timely responses as it involves direct communication </td></tr><tr><td></td><td> - Involves the information and content you're actually sharing OR - Marketing OR - Basically delivers a message to a large audience OR - May not have specific target audience OR - May not have timely responses as it is not fully interactive </td></tr></table>	Examples of Social Media	Descriptions		- Relates who your audience is and the relationships you have with them OR - Discussion and building the relationships OR - Involves two way communications OR - Specific audiences / a number of people in the group OR - Enhances timely responses as it involves direct communication		- Involves the information and content you're actually sharing OR - Marketing OR - Basically delivers a message to a large audience OR - May not have specific target audience OR - May not have timely responses as it is not fully interactive	J1 <i>Select any one (1) answer</i> J1 <i>Select any one (1) answer</i>				
Examples of Social Media	Descriptions											
	- Relates who your audience is and the relationships you have with them OR - Discussion and building the relationships OR - Involves two way communications OR - Specific audiences / a number of people in the group OR - Enhances timely responses as it involves direct communication											
	- Involves the information and content you're actually sharing OR - Marketing OR - Basically delivers a message to a large audience OR - May not have specific target audience OR - May not have timely responses as it is not fully interactive											

6(c)(ii)	E-Commerce Short for electronic commerce, is a business transaction that occurs over an electronic network such as the Internet.	J1 J1
6(d)(i)	censorship can filter and block information & • prevent fake news from spreading widely to others. • minimize cybersecurity threats from attacking an individual or organization on the network. • preventing sensitive / provocative issues <i>Any acceptable answer.</i>	J1 J1 <i>Select any one (1)</i>
6(d)(ii)	Limit individuals' freedom of expression (J1) by restricting access to sites where they can speak freely (J1). <i>Any acceptable answer.</i>	J2
6(e)	Web Browsing Privacy • Web browsing privacy encompasses what information about individuals is available, how it is used, and by whom. Email Privacy • Email privacy refers to keeping emails secured, either while in transit or while they're stored on a server.	J1 J1 J1 J1
6(f)	• making our lives more convenient, • saving us money, and • providing us with better healthcare and other services. <i>Any acceptable answer.</i>	J2 <i>Select any one (1)</i>
