Authoring Tool	Example										
Icon-based	• Adobe Authorware • Icon Author										
Page-based	• OpenOffice Impress • Microsoft Power Point • HyperCard										
Time-based	• Adobe Flash • Adobe Director • Ktoon										
	c)	<table><tr><th>Web-Based Multimedia Delivery</th><th>CD-based Multimedia Delivery</th></tr><tr><td>The contents are updatable.</td><td>The contents are not updatable; contents are 'read only' purpose.</td></tr><tr><td>Various storage capacity, depends on the capacity of servers</td><td>Can contain up to 650MB-700MB of full-screen videos,</td></tr></table>	Web-Based Multimedia Delivery	CD-based Multimedia Delivery	The contents are updatable.	The contents are not updatable; contents are 'read only' purpose.	Various storage capacity, depends on the capacity of servers	Can contain up to 650MB-700MB of full-screen videos,	J1/J1 Pair of answer Total = J4		
Web-Based Multimedia Delivery	CD-based Multimedia Delivery										
The contents are updatable.	The contents are not updatable; contents are 'read only' purpose.										
Various storage capacity, depends on the capacity of servers	Can contain up to 650MB-700MB of full-screen videos,										

		photos, movies, courseware, music, games	
3	a)	A database management system (DBMS) is application software allows users to create, maintain, access, and manage a database. <i>any acceptable answer</i>	J2
	b)	Reduced Data Redundancy : Data is only entered one time, and stored in only one file (no duplication of data). Shared Data – The data in a database belongs to and is shared over a network, by the entire organization. Data Consistency – Data is only entered once, and stored in only one file (no duplication of data). So, when student's data is entered or changed, the changes are only made once, there is no different versions of the same data. <i>any acceptable answer</i>	J2
	c)	Hardware, Software, People, Procedure, Data	J2 Choose any two (2)
4	a)	bit,byte, field, record and table	J1
	b)	Entity Relationship Diagram (ERD) A tool that is used to graphically show the connections among entities in a system <i>any acceptable answer</i>	J2
	c)	Cardinality - One to One (1 : 1)	J1
5	a)	A network is a collection of computers and other hardware devices connected together so that network users can share hardware, software, and data, as well as communicate with each other electronically. Or A network is a collection of computers and mobile devices connected together via network devices and network media .	J2 Choose any one (1)

		<i>any acceptable answer</i>									
	b i)	Applications Monitoring System (GPS-based Monitoring Systems)	J2								
	b ii)	Wireless Networking Media (Microwave and Satellite Transmission)	J2								
	c i)	Wired Networking Media Wireless Networking Media	J2								
	c ii)	Network adapter/Network card/ Network Interface Card (NIC) Modem Routers Wireless Access Point	J2 Choose any two (2)								
	c iii)	Wireless access point, Routers / wifi routers	J1 Choose any one (1)								
	d i)	<table border="1"><thead><tr><th>Function</th><th>Network Device</th></tr></thead><tbody><tr><td>It is a circuit board installed in a computer that provides a dedicated network connection to the computer</td><td>Network adapter (NIC)</td></tr><tr><td>connect multiple devices, such as computers, wireless access points, printers, and servers; on the same network within a building or campus.</td><td>Switches</td></tr><tr><td>used to extend transmissions so that the signal can cover long distances</td><td>Repeaters</td></tr></tbody></table>	Function	Network Device	It is a circuit board installed in a computer that provides a dedicated network connection to the computer	Network adapter (NIC)	connect multiple devices, such as computers, wireless access points, printers, and servers; on the same network within a building or campus.	Switches	used to extend transmissions so that the signal can cover long distances	Repeaters	J1 J1 J1
Function	Network Device										
It is a circuit board installed in a computer that provides a dedicated network connection to the computer	Network adapter (NIC)										
connect multiple devices, such as computers, wireless access points, printers, and servers; on the same network within a building or campus.	Switches										
used to extend transmissions so that the signal can cover long distances	Repeaters										
	e i)	network device X : modem network device Y : router / wireless router	J1 J1								
	e ii)	Network device Y to Laptop : Wireless Networking Media Network device X to Printer : Wired Networking Media	J1 J1
