

Logarithm $\Rightarrow \textcircled{2} \log(a^{\textcircled{1}}x + b) + c$

Φ	$(1, 2) \Rightarrow (+, +), (-, +), (-, -), (+, -)$	$\Rightarrow$ Quadrant
I	$y = 0, x = \text{---}$ substitute $y = 0$	$\Rightarrow$ Intercept x
A	$ax + b > 0 \rightarrow x > -b/a$	$\Rightarrow$ Vertical Asymptote (V.A)

Basic of graph

$D_f: (-\infty, \text{v.A}) \textcircled{a} (\text{v.A}, \infty)$
 $R_f: (-\infty, \infty)$
