

Answer Scheme Trial PSPM KMKt

Question	Answer scheme	Mark												
1(a)	Text Audio Graphic/Image Animation Video	Select any two (2) J1, J1												
1(b)	<table><tr><th>Element</th><th>Explanation</th></tr><tr><td>Text</td><td> • To increase understanding • To represent fact such as date, title • As a caption to a graphic • To serve as a link/hypertext to other pages </td></tr><tr><td>Audio</td><td> • To capture attention: a sound in a multimedia presentation will capture an audience's attention. • To increase the associations the end-users make with the information in their mind (sound of a duck), thus increasing their retention rate. • Audio adds an exciting dimension to a presentation. </td></tr><tr><td>Graphic</td><td> • Convey information more quickly than when using text. • Make complex information easy to understand. • To present information more attractively. • To illustrate ideas through still pictures. • Images - used to add emphasis, direct attention, illustrate concepts and provide background content. • Complementary element - used as background and texture. </td></tr><tr><td>Animation</td><td> • Animation is useful for illustrating concepts which involve movement. • Can help organize thoughts and illustrate processes. • Can graphically simplify complicated concepts and convey complex inter-relationships, which are difficult to visualize. • Inject humor and light-heartedness in a presentation via an animated cartoon. • Can attract audience attention </td></tr><tr><td>Video</td><td> • Video shows the real situation of the event </td></tr></table>	Element	Explanation	Text	• To increase understanding • To represent fact such as date, title • As a caption to a graphic • To serve as a link/hypertext to other pages	Audio	• To capture attention: a sound in a multimedia presentation will capture an audience's attention. • To increase the associations the end-users make with the information in their mind (sound of a duck), thus increasing their retention rate. • Audio adds an exciting dimension to a presentation.	Graphic	• Convey information more quickly than when using text. • Make complex information easy to understand. • To present information more attractively. • To illustrate ideas through still pictures. • Images - used to add emphasis, direct attention, illustrate concepts and provide background content. • Complementary element - used as background and texture.	Animation	• Animation is useful for illustrating concepts which involve movement. • Can help organize thoughts and illustrate processes. • Can graphically simplify complicated concepts and convey complex inter-relationships, which are difficult to visualize. • Inject humor and light-heartedness in a presentation via an animated cartoon. • Can attract audience attention	Video	• Video shows the real situation of the event	Select any two (2) J2, J2 OR any appropriate answer
Element	Explanation													
Text	• To increase understanding • To represent fact such as date, title • As a caption to a graphic • To serve as a link/hypertext to other pages													
Audio	• To capture attention: a sound in a multimedia presentation will capture an audience's attention. • To increase the associations the end-users make with the information in their mind (sound of a duck), thus increasing their retention rate. • Audio adds an exciting dimension to a presentation.													
Graphic	• Convey information more quickly than when using text. • Make complex information easy to understand. • To present information more attractively. • To illustrate ideas through still pictures. • Images - used to add emphasis, direct attention, illustrate concepts and provide background content. • Complementary element - used as background and texture.													
Animation	• Animation is useful for illustrating concepts which involve movement. • Can help organize thoughts and illustrate processes. • Can graphically simplify complicated concepts and convey complex inter-relationships, which are difficult to visualize. • Inject humor and light-heartedness in a presentation via an animated cartoon. • Can attract audience attention													
Video	• Video shows the real situation of the event													

	hence helps viewers retain more of what they see. Provides a powerful and realistic impact in a multimedia program							
2(a)(i)	Type A: 2D Type B: 4D	J1 J1						
2(a)(ii)	Type B or 4D in graphic or animation is more fascinating because - more realistic - shows movement in real-time - extra simulation	J2 OR any appropriate answer						
2(a)(iii)	<table><tr><th>Multimedia element</th><th>Comparison</th></tr><tr><td>3D medium size vector graphic or image</td><td>The file size is small</td></tr><tr><td>3D one hour duration animation movie</td><td>The file size is bigger</td></tr></table>	Multimedia element	Comparison	3D medium size vector graphic or image	The file size is small	3D one hour duration animation movie	The file size is bigger	J1 J1
Multimedia element	Comparison							
3D medium size vector graphic or image	The file size is small							
3D one hour duration animation movie	The file size is bigger							
2(b)(i)	Time based - The multimedia elements or events are presented and organized along a timeline. Card/Page based - The elements are organized as pages of a book or a stack of cards.	J2 J2						
2(b)(ii)	Hypertext Hypermedia Tab Audio Menu	Select any two (2) J1, J1						
2(c)(i)	Online Offline	J1 J1						
2(c)(ii)	Online multimedia option is better if the content needs to regularly update. Offline multimedia option is better if the content is very large and have to deliver to small amount of people	Select any one (1) J2						
3(a)	Database systems consist of the data and the DBMS, along with the applications that are associated with them	J2						
3(b)	- Reducing data redundancy/ Data Consistency - database system can eliminating duplicate data - Improved Data Integrity - there are no data inconsistencies because the data is centralized - Sharing of Data - The ability to share the same data resource with multiple applications or users because the data are stored in one or more servers in the network	Select any one (1) J2						

	• Easier access - queries in database system provide an easy route to search for the required data • Reduced development time - database system capable of organizing information efficiently, protecting valuable data from failure, and accurately communicating with other systems. Reduce the amount of time you spend managing large amounts of data; analyse data in a variety of ways. • Data Security and Privacy - validating the identity of the user who is accessing the database (authentication) and controlling what operations they can perform (authorization). Strong authentication and authorization controls help protect data from attackers. • Backup and Recovery - It provides backup and recovery of data even if it is lost.	
3(c)(i)	Procedure	J1
3(c)(ii)	Data	J1
4(a)	Data integrity ensures the consistency / accuracy of data.	J2
4(b)(i)	Form	J1
4(b)(ii)	Query	J1
5(a)(i)	GPS - satellite navigation system used to determine the ground position/ location of an object or place	J2
5(a)(ii)	Video conference - Meeting between two or more geographically separated people to transmit video and audio data	J2
5(b)(i)	Networking media - the means consisting of materials or substances capable of carrying one or more signals (data) sent from one computer to another (either by cable or wireless means).	J2
5(b)(ii)	Wireless networking media	J2
5(b)(iii)	wifi fiber optic cable twisted pair cable	Select any two (2) J2 OR any appropriate answer
5(c)(i)	A network / communications device is any type of hardware capable of transmitting data, instructions, and information between a sending device and a receiving device	J2
5(c)(ii)	Wireless access point hardware/device that provides a central point wirelessly to transfer data among themselves or to a wired network	J1 J1
5(c)(iii)	switch / hub	J2
5(c)(iv)	Network interface card (NIC) Switch Repeater	Select any two (2) J1, J1
6(a)(i)	Search engine	J1
6(a)(ii)	Subject directory	J1
6(b)(i)	• Search operators can help to refine/ precise/ specific/ filter your search result • Increase the accuracy/ be more specific	J2 OR any appropriate answer

6(b)(ii)	- include “ .. ” in searching (“art music”) - include OR in searching (dog OR cat) - include * (writer*) - include - (-hiking) <i>with or without example in the bracket is acceptable</i> <i>only example in the bracket also acceptable</i>	Select any two (2) J1, J1 OR any appropriate answer									
6(c)(i)	<table border="1"> <thead> <tr> <th></th><th>(i) Instant Messaging</th><th>(ii) E-commerce</th></tr> </thead> <tbody> <tr> <td>Description</td><td> - real time Internet communication service </td><td> - not real time, marketing good/ services on the Internet </td></tr> <tr> <td>Example</td><td>whatsApps messenger, FB messenger</td><td>Ebay, shopee.com, lazada</td></tr> </tbody> </table>		(i) Instant Messaging	(ii) E-commerce	Description	real time Internet communication service	not real time, marketing good/ services on the Internet	Example	whatsApps messenger, FB messenger	Ebay, shopee.com, lazada	J2, J2 J1, J1
	(i) Instant Messaging	(ii) E-commerce									
Description	real time Internet communication service	not real time, marketing good/ services on the Internet									
Example	whatsApps messenger, FB messenger	Ebay, shopee.com, lazada									
6(d)(i)	- Fill in only necessary information on a web/ Internet application - Memorize your pin number, do not keep in your wallet - Clear cookies / Internet history - Install personal firewall - Do not open/reply spam email	Select any two (2) J1, J1 OR any appropriate answer									
6(d)(ii)	- Protect from information theft / identity theft that manipulate your identity to serve their goals - Oversharing - Posting videos of your home gives them a full map of your belongings may lead to crime. - Cookies (remember password) may lead to loss of money	Select any one (1) J2 OR any appropriate answer									
6(e)(i)	Internet of Things (IoT) is example of 4IR application	J2									
6(e)(ii)	- Smart doorbells help secure your home against break-ins, fire, and floods - Smart / IP cameras help monitor your home - Smart Heating & Cooling system be able to adjust temperatures for your comfort from anywhere - Smart refrigerators have a variety of features that you can control via mobile phone app such as monitor what's inside, and a touchscreen on which you can pull up recipes or create shopping lists. - Smart appliances are compatible with industry voice assistants, so you can ask Siri, Alexa, or Google Assistant to dispense ice or turn on your oven.
