

ANSWER SCHEME PREPSM DC014 KMPP 22/23

QUESTION	ANSWER	MARKS												
1(a)(i)	A digital representation of non text information such as photographs, drawings, charts and other visual objects. (Any acceptable answers)	J2												
1(a)(ii)	To direct attention and add emphasis (J1) by using pictures and icons.(J1) (Any acceptable answers)	J1 J1												
1(a)(iii)	X- axis , y-axis and z-axis (J1) 3 dimension (J1)	J1 J1												
2(a)(i)	The process in which multimedia products are produced.	J2												
2(a)(ii)	<table><tr><th>Description</th><th>Multimedia Phases</th></tr><tr><td>Murugan has to make sure that the end product is at par with the storyboard.</td><td>Production (Quality Control)</td></tr><tr><td>Mohsin needs to identify how the user will interact with the interface of the multimedia product.</td><td>Pre Production (Define screen action)</td></tr><tr><td>Marina needs to ensure that the multimedia product is suitable in any type of devices such as laptops, tablets and personal computers.</td><td>Post Production (Testing)</td></tr><tr><td>Norli is incharge of converting non digital materials into digital materials</td><td>Production (Digitizing arts)</td></tr></table>	Description	Multimedia Phases	Murugan has to make sure that the end product is at par with the storyboard.	Production (Quality Control)	Mohsin needs to identify how the user will interact with the interface of the multimedia product.	Pre Production (Define screen action)	Marina needs to ensure that the multimedia product is suitable in any type of devices such as laptops, tablets and personal computers.	Post Production (Testing)	Norli is incharge of converting non digital materials into digital materials	Production (Digitizing arts)	J1 J1 J1 J1		
Description	Multimedia Phases													
Murugan has to make sure that the end product is at par with the storyboard.	Production (Quality Control)													
Mohsin needs to identify how the user will interact with the interface of the multimedia product.	Pre Production (Define screen action)													
Marina needs to ensure that the multimedia product is suitable in any type of devices such as laptops, tablets and personal computers.	Post Production (Testing)													
Norli is incharge of converting non digital materials into digital materials	Production (Digitizing arts)													
2(a)(iii)	<table><tr><th></th><th>Authoring Tool 1</th><th>Authoring Tool 2</th><th>Authoring Tool 3</th></tr><tr><td>Multimedia elements and events are arranged</td><td>Along a timeline</td><td>As pages of book or stack of cards</td><td>Into structural framework as an object in a flowchart</td></tr><tr><td>Example</td><td>Adobe Animate</td><td>PowerPoint</td><td>Scratch</td></tr></table>		Authoring Tool 1	Authoring Tool 2	Authoring Tool 3	Multimedia elements and events are arranged	Along a timeline	As pages of book or stack of cards	Into structural framework as an object in a flowchart	Example	Adobe Animate	PowerPoint	Scratch	J2 For any two of the authoring tools J2 For any two of the authoring tools
	Authoring Tool 1	Authoring Tool 2	Authoring Tool 3											
Multimedia elements and events are arranged	Along a timeline	As pages of book or stack of cards	Into structural framework as an object in a flowchart											
Example	Adobe Animate	PowerPoint	Scratch											
2(a)(iv)	A: Menu B: Hypermedia	J1 J1												

2(b)(i)	<table><tr><td>Method 1: <u>Online</u></td><td>How: Photo sharing online via Google Drive/ WeTransfer/ Dropbox/ Pixieset/ Smash (Any acceptable answer)</td></tr><tr><td>Method 2: <u>Offline</u></td><td>How: Hard copy via flash drive, memory card, external hard drive or CD. (Any acceptable answers)</td></tr></table>	Method 1: <u>Online</u>	How: Photo sharing online via Google Drive/ WeTransfer/ Dropbox/ Pixieset/ Smash (Any acceptable answer)	Method 2: <u>Offline</u>	How: Hard copy via flash drive, memory card, external hard drive or CD. (Any acceptable answers)	J1 J1 J1 J1						
Method 1: <u>Online</u>	How: Photo sharing online via Google Drive/ WeTransfer/ Dropbox/ Pixieset/ Smash (Any acceptable answer)											
Method 2: <u>Offline</u>	How: Hard copy via flash drive, memory card, external hard drive or CD. (Any acceptable answers)											
3(a)	<table><tr><th>File Processing System</th><th>Database System</th></tr><tr><td>Each department or area within an organization has its own set of files.</td><td>All departments or areas within an organization share the data in the database.</td></tr><tr><td>Originally designed to store and manipulate data for a single user.</td><td>Databases are designed to store and manipulate large collections of organized information</td></tr><tr><td>Accessible by a single user or small number of users who don't need to do a lot of incredibly complicated data manipulation.</td><td>Accessible by allowing multiple users at the same time to quickly and securely access and query the data using highly complex logic and language.</td></tr><tr><td>Relatively smaller amount of data</td><td>Relatively larger amount of data</td></tr></table>	File Processing System	Database System	Each department or area within an organization has its own set of files.	All departments or areas within an organization share the data in the database.	Originally designed to store and manipulate data for a single user.	Databases are designed to store and manipulate large collections of organized information	Accessible by a single user or small number of users who don't need to do a lot of incredibly complicated data manipulation.	Accessible by allowing multiple users at the same time to quickly and securely access and query the data using highly complex logic and language.	Relatively smaller amount of data	Relatively larger amount of data	Choose any 1 comparison J1, J1
File Processing System	Database System											
Each department or area within an organization has its own set of files.	All departments or areas within an organization share the data in the database.											
Originally designed to store and manipulate data for a single user.	Databases are designed to store and manipulate large collections of organized information											
Accessible by a single user or small number of users who don't need to do a lot of incredibly complicated data manipulation.	Accessible by allowing multiple users at the same time to quickly and securely access and query the data using highly complex logic and language.											
Relatively smaller amount of data	Relatively larger amount of data											
3(b)	Ineffectiveness of file processing system • Data redundancy • Data isolation • Difficult concurrent access • Security problems • Difficult data access	Choose any 1 J2										
3(c)	Advantage of using a database system • Improved decision making • Improved data security • Minimized data inconsistency • Better data integration • Improved data access • Improved data sharing • Increased end-user productivity	Choose any 1 J2										

4(a)	<table><tr><td>Query</td><td>A request for specific data from the database (retrieve data).</td></tr><tr><td>Table</td><td>A collection of related records that identify a category of data, such as Students, Lecturers or Academics.</td></tr></table>	Query	A request for specific data from the database (retrieve data).	Table	A collection of related records that identify a category of data, such as Students, Lecturers or Academics.	J1 J1		
Query	A request for specific data from the database (retrieve data).							
Table	A collection of related records that identify a category of data, such as Students, Lecturers or Academics.							
4(b)	- Form - Report	Any 1 J1						
4(c)	<table><tr><td>Form</td><td>A window on the screen that provides areas for entering or modifying data in a database</td></tr><tr><td>Report</td><td>A report generator allow users to design a report on the screen, retrieve data into the report design and then display or print the report.</td></tr></table>	Form	A window on the screen that provides areas for entering or modifying data in a database	Report	A report generator allow users to design a report on the screen, retrieve data into the report design and then display or print the report.	Answer based on 4(b) J1		
Form	A window on the screen that provides areas for entering or modifying data in a database							
Report	A report generator allow users to design a report on the screen, retrieve data into the report design and then display or print the report.							
5(a)(i)	- Can share software such as file or folder - Can share hardware such as printer - Can communicate easily with other devices (Accept any suitable answer)	J2 Choose any 1						
5(b)(i)	- Telemedicine - Telesurgery - Medline (Accept any suitable answer)	J1 Choose any 1						
5(b)(ii)	- Telemedicine- the use of networking technology to provide medical information and services - Telesurgery—a form of robot-assisted surgery where a robot controlled by a physician remotely do operations on the patient. - Medline- website that provide up-to-date healthcare information (Accept any suitable answer)	J2 Choose any 1						
5(c)(i)	<table><tr><td>Wired</td><td>Wireless</td></tr><tr><td>Use physical medium such as cable/wire to transfer signal from transmitter to receiver.</td><td>Use air, water or vacuum without physical medium to transfer signal from transmitter to receiver</td></tr><tr><td>Suitable for short distance communication</td><td>Suitable for long distance communication</td></tr></table> Accept any suitable answer	Wired	Wireless	Use physical medium such as cable/wire to transfer signal from transmitter to receiver.	Use air, water or vacuum without physical medium to transfer signal from transmitter to receiver	Suitable for short distance communication	Suitable for long distance communication	J2 Choose any 1
Wired	Wireless							
Use physical medium such as cable/wire to transfer signal from transmitter to receiver.	Use air, water or vacuum without physical medium to transfer signal from transmitter to receiver							
Suitable for short distance communication	Suitable for long distance communication							

5(c)(ii)	Wired: twisted-pair, coaxial, fiber-optic Wireless: cellular radio, microwave and satellite, infrared	J4 Choose any 2 for each type of networking media
5(d)(i)	Switch- a device that provides a central point for cables in a network	J2
5(d)(ii)	Router connects multiple networks and allows the networked devices and users to access the internet.	J2
5(d)(iii)	• Network adapter/NIC • Modem • WAP • Hub • Repeater	J1 Choose any 1
5(d)(iv)	• NIC - enables a computer or device that does not have built-in networking capability to access a network • Modem- converts data from a digital format into an analog format and vice versa • WAP- central communications device that allows computers and devices to transfer data wirelessly among themselves or to a wired network • Hub - device that provides a central point for cables in a network. • Repeater- regenerate the signal over the same network before the signal becomes too weak or corrupted	J2 Choose any 1
6(a)(i)	Search engine	J1
6(a)(ii)	Search engine is a software that find information on the web related to a specific topic .	J2
6(b)(i)	Using field searches	J1
6(b)(ii)	Using Boolean operators	J1
6(b)(iii)	Using field searches	J1

6(c)	"Computer Science" search for exact words or phrases to narrow down the results even more	J2
6(d)(i)	e-commerce Online education and writing Online news	J1 J1 J1
6(d)(ii)	- Online communications using IM, VoIP or forums to communicate with other people. - Social networking/social media using Instagram, Facebook or Pinterest to share similar personal or career content, interests and activities. - Online entertainment using Netflix or Youtube to play videos online. Or any related answers	J2
6(e)(i)	Web browsing privacy Censorship Email privacy	J1 J1 J1
6(e)(ii)	- Filter to restrict access to Web pages that contain offensive language, sex or pornography, racism, drugs or violence - privacy settings to private browsing, controlling activity logs and deleting cookies - Use anti virus or Spyware and Adware remover to remove unwanted programs - Secure confidential attachment such as using password - Always enable 2 steps verification Or any related answers	J2
6(f)(i)	- The demand for workers with less education and lower skills has decreased because of automation. - Technology will lead to widespread unemployment because jobs are vulnerable to automation. (Any acceptable answers)	J2
