Question No.	Answer	Mark
1 (a)	Audio/Sound - Audio is the use of speech, music and sound effects. - Produced by vibration, as perceived by the sense of hearing. - Audio is vibrations in the air that create waves of pressure such as music, spoken voice, and sound effects. Graphic/Image - A digital representation of non-text information Animation - Animation is a process of making a static image look like it is moving. - Animation is a series of graphical images displayed one after another to simulate movement. - Animation is a continuous series of still images that are displayed in a sequence, one after another to simulate movement / create an illusion of motion. Text - Combination of letters that form a word or sentence that describe a topic which is known as text information. - Text is a basic element of multimedia that combine alphabets, numbers and symbol Video - Video is a series of frames containing pictures and sound played back at a fast rate. - Video is a product of recording moving visual images by using a camera or video machine. - Video is product of recording moving visual images using digital camera or video devices	Select any one (1) J2

1 (b)	- To make multimedia application more attractive which illustrate ideas through still pictures. - To convey information more interesting, faster and easier. - To provide listening pleasure of music, special effect or the ambience of a mood setting background. - To provide interesting presentation. - To capture attention: a sound in a multimedia presentation will capture an audience's attention.	Select any one (1) J2								
1 (c)	<table border="1"> <thead> <tr> <th></th><th>Three-dimensional (3D)</th><th>Four-dimensional (4D)</th></tr> </thead> <tbody> <tr> <td rowspan="2">Dimension</td><td>Consist of three-dimension (length, width & height)</td><td>Consist of four-dimension (length, width & height with another direction through space/motion)</td></tr> <tr> <td>length, no depth (width) & height</td><td>length, width & height and time/motion</td></tr> </tbody> </table>		Three-dimensional (3D)	Four-dimensional (4D)	Dimension	Consist of three-dimension (length, width & height)	Consist of four-dimension (length, width & height with another direction through space/motion)	length, no depth (width) & height	length, width & height and time/motion	J1, J1
	Three-dimensional (3D)	Four-dimensional (4D)								
Dimension	Consist of three-dimension (length, width & height)	Consist of four-dimension (length, width & height with another direction through space/motion)								
	length, no depth (width) & height	length, width & height and time/motion								
2 (a)	Production - Digitizing arts - Converting existing assets into digital for the use in an electronic medium. - Modelling & animation - Models of artwork are created, rendered, and then prepared for use in the authoring tool - Shooting video - Shoot video based on the edited scripts - Recording audio - Composed audio to be used with other MM elements - Authoring - All the pieces come together in the authoring tool. The final working product is created - Proofreading - Every word on the screen is proofread and checked for consistency. In addition, video and audio are checked against the edited scripts - Quality control - Quality control goes on throughout the process. The storyboards are helpful for checking the sequencing - Scriptwriting - The scripts for the text, transitions, audio narrations, voice-overs, and video are written. Even existing material needs to be rewritten and reorganized for an electronic medium. - Editing - All the scripts, interfaces, and text content are edited for clarity, grammar, and consistency.	Select any one (1) J2								

[illegible]

2 (c) (i)	<table> <tr> <th>Criteria <i>Kriteria</i></th><th>Icon-Based <i>Berasaskan Ikon</i></th><th>Card/Page-Based <i>Berasaskan Kad/Halaman</i></th></tr> <tr> <td>Technique <i>Teknik</i></td><td>organized as objects in a structural framework or process</td><td>organized as pages of a book</td></tr> </table>	Criteria <i>Kriteria</i>	Icon-Based <i>Berasaskan Ikon</i>	Card/Page-Based <i>Berasaskan Kad/Halaman</i>	Technique <i>Teknik</i>	organized as objects in a structural framework or process	organized as pages of a book	J1, J1												
Criteria <i>Kriteria</i>	Icon-Based <i>Berasaskan Ikon</i>	Card/Page-Based <i>Berasaskan Kad/Halaman</i>																		
Technique <i>Teknik</i>	organized as objects in a structural framework or process	organized as pages of a book																		
2 (c) (ii)	B = Tab the clickable area at the top that shows another page or area.	J1, J1																		
2 (d)	<table> <tr> <th>Criteria <i>Kriteria</i></th><th>Offline <i>Luar talian</i></th><th>Online <i>Dalam talian</i></th></tr> <tr> <td>Contents</td><td>Permanent and not changeable. Contents at a risk to damage or lost</td><td>Can be changed and updated at any time by the developer. Contents remains as original</td></tr> <tr> <td>Accessibility</td><td>Can be accessed without internet connection</td><td>Require broadband internet connection to access multimedia contents</td></tr> <tr> <td>Capacity</td><td>Store limited in picture size and low resolution video</td><td>Store high end multimedia contents such as video</td></tr> <tr> <td>Speed (data transfer rate)</td><td>Relatively faster data transfer rate</td><td>Relatively slower data transfer rate. Subject to the constraints of the user's network</td></tr> <tr> <td>Ease of editing / updatable</td><td>Can be permanently stored and are not editable. But can be changed/ damaged/ deleted by irresponsible individuals.</td></tr> </table>	Criteria <i>Kriteria</i>	Offline <i>Luar talian</i>	Online <i>Dalam talian</i>	Contents	Permanent and not changeable. Contents at a risk to damage or lost	Can be changed and updated at any time by the developer. Contents remains as original	Accessibility	Can be accessed without internet connection	Require broadband internet connection to access multimedia contents	Capacity	Store limited in picture size and low resolution video	Store high end multimedia contents such as video	Speed (data transfer rate)	Relatively faster data transfer rate	Relatively slower data transfer rate. Subject to the constraints of the user's network	Ease of editing / updatable	Can be permanently stored and are not editable. So can be quickly outdated.	Can be edited n updatable. But can be changed/ damaged/ deleted by irresponsible individuals.	Select any two (2) J1, J1 J1, J1
Criteria <i>Kriteria</i>	Offline <i>Luar talian</i>	Online <i>Dalam talian</i>																		
Contents	Permanent and not changeable. Contents at a risk to damage or lost	Can be changed and updated at any time by the developer. Contents remains as original																		
Accessibility	Can be accessed without internet connection	Require broadband internet connection to access multimedia contents																		
Capacity	Store limited in picture size and low resolution video	Store high end multimedia contents such as video																		
Speed (data transfer rate)	Relatively faster data transfer rate	Relatively slower data transfer rate. Subject to the constraints of the user's network																		
Ease of editing / updatable	Can be permanently stored and are not editable. So can be quickly outdated.	Can be edited n updatable. But can be changed/ damaged/ deleted by irresponsible individuals.																		

3 (a)	<table><tr><th>File Processing System Sistem Pemprosesan Fail</th><th>Database Approach Pendekatan Pangkalan Data</th></tr><tr><td>designed for single user which relatively can store smaller amount of data.</td><td>Designed for multiple user to hold much larger collections of organized information.</td></tr></table>	File Processing System Sistem Pemprosesan Fail	Database Approach Pendekatan Pangkalan Data	designed for single user which relatively can store smaller amount of data.	Designed for multiple user to hold much larger collections of organized information.	J1, J1
File Processing System Sistem Pemprosesan Fail	Database Approach Pendekatan Pangkalan Data					
designed for single user which relatively can store smaller amount of data.	Designed for multiple user to hold much larger collections of organized information.					
3 (b)	- Complexity – Very complex piece of software, and all users must understand its functionality. - Cost – the cost can be of many types like hardware or software costs or data storage costs - Cost of conversion – may be insignificant compared with the cost of converting existing application to run on the new hardware - Performance – may not be as efficient as some problem-specific software in some applications - Frequent Updates/Upgrades – Software is regularly being updated by vendors so updating the software also increases the need of updating the hardware used for that software Any acceptable answer	J2				
3 (c)	- Hardware - Software - People - Procedure - Data	Select any two (2) J1, J1				
4 (a)	<table><tr><td>X = record</td><td> - groups of related fields. - collection of related field (known as row) </td></tr><tr><td>Y = table</td><td> - made up of related records. - collection of related record </td></tr></table>	X = record	- groups of related fields. - collection of related field (known as row)	Y = table	- made up of related records. - collection of related record	J1, J1
X = record	- groups of related fields. - collection of related field (known as row)					
Y = table	- made up of related records. - collection of related record					
4 (b)	Data accuracy data values stored for an object are the correct values. Data validity delivery of clean and clear data to the programs, applications and services using it. Data consistency each user sees a reliable view of the data, including visible changes made by the user own transactions and transactions of other users.	Select any one (1) J2				

	Any acceptable answer																
5 (a) (i)	<table><tr><th>A</th><th>B</th></tr><tr><td>Wired / Wired transmission media / Guide media / Bounded networking media</td><td>Wireless / Wireless transmission media / Unguided media / Unbounded networking media</td></tr></table>	A	B	Wired / Wired transmission media / Guide media / Bounded networking media	Wireless / Wireless transmission media / Unguided media / Unbounded networking media	Select any one (1) J1, J1											
A	B																
Wired / Wired transmission media / Guide media / Bounded networking media	Wireless / Wireless transmission media / Unguided media / Unbounded networking media																
5 (a) (ii)	<table><tr><td>A</td><td>Signals being transmitted are directed and confined in a narrow pathway by using physical links.</td></tr><tr><td>B</td><td>No physical medium is required for the transmission of electromagnetic signals</td></tr></table>	A	Signals being transmitted are directed and confined in a narrow pathway by using physical links.	B	No physical medium is required for the transmission of electromagnetic signals	J2, J2											
A	Signals being transmitted are directed and confined in a narrow pathway by using physical links.																
B	No physical medium is required for the transmission of electromagnetic signals																
5 (a) (iii)	<table><tr><th>Type Jenis</th><th>A</th><th>B</th></tr><tr><td>Example 1 Contoh 1</td><td>Twisted-Pair cable</td><td>Cellular radio transmission</td></tr><tr><td>Example 2 Contoh 2</td><td>Coaxial cable</td><td>Microwave and satellite transmission</td></tr><tr><td></td><td>Fibre-optic cable</td><td>Infrared (IR) Transmission</td></tr><tr><td></td><td></td><td>Any acceptable answer</td></tr></table>	Type Jenis	A	B	Example 1 Contoh 1	Twisted-Pair cable	Cellular radio transmission	Example 2 Contoh 2	Coaxial cable	Microwave and satellite transmission		Fibre-optic cable	Infrared (IR) Transmission			Any acceptable answer	Select any two (2) J1, J1 J1,J1
Type Jenis	A	B															
Example 1 Contoh 1	Twisted-Pair cable	Cellular radio transmission															
Example 2 Contoh 2	Coaxial cable	Microwave and satellite transmission															
	Fibre-optic cable	Infrared (IR) Transmission															
		Any acceptable answer															
5 (b) (i)	a device that provides a central point for cables in a network Any acceptable answer	J2															
5 (b) (ii)	connects multiple networks and allows the networked devices and users to access the internet Any acceptable answer	J2															
5 (b) (iii)	<table><tr><th>Network device Peranti rangkaian</th><th>Function Fungsi</th></tr><tr><td>Wireless Access Point</td><td>A central communications device that allows computers and devices to transfer data wirelessly among themselves or to a wired network using wireless technologies</td></tr></table>	Network device Peranti rangkaian	Function Fungsi	Wireless Access Point	A central communications device that allows computers and devices to transfer data wirelessly among themselves or to a wired network using wireless technologies	J2, J2											
Network device Peranti rangkaian	Function Fungsi																
Wireless Access Point	A central communications device that allows computers and devices to transfer data wirelessly among themselves or to a wired network using wireless technologies																

	<table><tr><td><i>Network Interface Card</i></td><td>A communication device that enables a computer or device that does not have built in networking capability to access a network</td></tr></table>	<i>Network Interface Card</i>	A communication device that enables a computer or device that does not have built in networking capability to access a network			
<i>Network Interface Card</i>	A communication device that enables a computer or device that does not have built in networking capability to access a network					
6 (a) (i)	<table><tr><td>Search tool 1 : Alat carian 1 : search engines – keyword search</td><td>Search tool 2 : Alat carian 2 : subject directories – directory search</td></tr><tr><td>A search engine is a program that finds Web sites, Web pages, images, videos, news, maps, and other information related to a specific topic.</td><td>A subject directory classifies Web pages in an organized set of categories, such as sports or shopping, and related subcategories.</td></tr></table>	Search tool 1 : Alat carian 1 : search engines – keyword search	Search tool 2 : Alat carian 2 : subject directories – directory search	A search engine is a program that finds Web sites, Web pages, images, videos, news, maps, and other information related to a specific topic.	A subject directory classifies Web pages in an organized set of categories, such as sports or shopping, and related subcategories.	J1, J1 J2, J2
Search tool 1 : Alat carian 1 : search engines – keyword search	Search tool 2 : Alat carian 2 : subject directories – directory search					
A search engine is a program that finds Web sites, Web pages, images, videos, news, maps, and other information related to a specific topic.	A subject directory classifies Web pages in an organized set of categories, such as sports or shopping, and related subcategories.					
6 (a) (ii)	search engines – keyword search Bing search, Yahoo search, Live search, Google search subject directories – directory search Yahoo directory, Open directory, Google directory Any acceptable answer	Select any one (1) J1 J1				
6 (a) (iii)	List search strategies - Using phrases - Using boolean operators - Using field searches	Select any two (2) J1, J1				
6 (a) (iv)	Using phrases -improve quality of the hits returned- essentially typing more than one keyword in a keyword search. Using boolean operators -to further specify exactly what you want to a search engine to find, using boolean (AND, OR NOT) used in keyword search. Using field searches -limits the search to a particular search characteristic (or field) such as page title, URL, page text, top level domain or web site.	Select any one (1) J2				

6 (a) (v)	<table><tr><td>M</td><td>Author’s Name</td></tr><tr><td>N</td><td>Book Title</td></tr></table>	M	Author’s Name	N	Book Title	J1, J1
M	Author’s Name					
N	Book Title					
6 (b) (i)	Web browsing privacy encompasses what information about individuals is available, how it is used, and by whom.	J2				
6 (b) (ii)	Email privacy refers to keeping emails secured, either while in transit or while they're stored in a server.	J2				
6 (c)	Home automation system Enable the appliances and other devices in your home such as alarm system, door locks, and sprinklers operate according to your stated preferences and can be controlled remotely via smartphone. Fitness systems Uses a sports-tested accelerometer to track your daily activity including running, walking, dancing etc in steps, time of day, and calories burned. You can set a personal goal for yourself and share your data with others via Facebook and Twitter.	Select any one (1) J2
