Questions no	Answer		Marks
1(a)	Text	Text is a basic element of multimedia that combine alphabets, numbers and symbol.	Element – 1 mark Explain – 1 mark <i>Select any one answer</i>
	Graphic	A digital representation of non-text information	
	Audio	Audio is the use of speech, music and sound effects	
	Animation	Animation is a process of making a static image look like it is moving.	
	Video	Video is a product of recording moving visual images by using a camera or video machine.	
	<i>any suitable answer</i>		
1(b)	Text	The purpose of incorporating text is to deliver clear and concise information. Text can be strategically used for headings, descriptions, and explanations on the business website. It serves to inform visitors about products, services, and important details, contributing to a better understanding of the business. This text can be strategically placed to highlight key information and attract the customer's attention.	Element – 1 mark Explain – 1 mark <i>Select any one answer</i>
	Graphic	The purpose of incorporating graphics is to visually enhance the website and convey information in a more engaging way. Graphics, such as images, icons, and infographics, add aesthetic appeal, emphasize key points, and contribute to brand recognition. They play a crucial role in attracting and retaining the user's attention.	

		could be an eye-catching graphic, such as a visually appealing logo or an infographic summarizing key business offerings. Graphics enhance visual appeal and help convey information quickly to customers.	
	Audio	might include background music or a brief audio clip that aligns with the brand's identity. Audio elements can evoke emotions and contribute to a more immersive customer experience. The purpose of incorporating audio is to enhance the auditory experience of the website. Background music, sound effects, or spoken content can create a pleasant atmosphere, grab attention, and convey additional information. Audio elements contribute to a more immersive and memorable user experience.	
	Animation	moving feature, like a spinning logo or a fun animation when users hover over a product image. This makes the website more interesting and keeps customers/visitors engaged. The purpose of incorporating an animated infographic is to make information more captivating and easily understandable. It adds a dynamic element to the presentation, attracting user attention and facilitating the communication of complex concepts in a visually appealing way. This enhances user engagement and promotes effective information retention.	
	Video	This involves embedding a short video clip featuring satisfied customers sharing their positive experiences. The purpose of incorporating a video is to deliver information in a compelling and engaging format. Video can showcase products, demonstrate services, and convey messages in a visually rich and immersive way. It enhances user engagement by providing a dynamic and comprehensive view of the business's offerings.	
Any suitable answer			

1(c)	Three dimensional (3D)	Four dimensional (4D)	3D – 1 mark 4D– 1 mark	
	on the x-axes, y-axes and z-axes	on the x-axes, y-axes and z-axes with the addition of time dimension		
2(a)(i)	Planning is the crucial factor determining success and failure of the project. If you fail to plan, you are planning to fail. <i>**any suitable answer</i>		2 marks	
2(a)(ii)	Description	Phase	4 marks (1 marks for each)	
	Fast & furious 9 make shooting video based on the edited scripts.	production		
	Flowcharts and storyboard are used as outline/blueprint for develop Web site project.	pre- production
