

DC014 PSPM - SCHEME - 2023/2024

QUESTION	ANSWER	MARK
1 (a)	a. Define multimedia. Multimedia is any combination of text, graphics, sound, animation, and video delivered to you by computer or other electronic or digitally manipulated means. OR Multimedia is a woven combination of digitally manipulated text, photographs, graphic art, sound, animation, and video elements. OR <i>Accept any other suitable answer.</i>	J2
1 (b)	types of graphic • Vector	J2
1 (c)	types of fonts • Serif	J2
2 (a)	i. Shape(Geometry) • Two-dimension: Flat/rectangular/square/triangle/polygon/ <i>Accept any other suitable answer.</i> • Three-dimension: Life-like/cylinder/sphere/cube/pyramid/prism/ <i>Accept any other suitable answer.</i> • Four-dimension: Abstract concept/ polychora//4-polytopes/made of polyhedral/made of two dimensional polygons	J1 for each
2 (a)	ii. Dimension • Two-dimensional (2D) representation It exists in two planes or axes, x-axis and y-axis, to determine its shape OR A 2D figure has only length and width in x-axis and y-axis respectively • Three-dimensional (3D) representation	J1 for each

	It exists in three planes or axes, x-axis, y-axis and z-axis, to deter its shape OR A 3D figure has length, width and height in the x-axis, y-axis and z-axis respectively. Four-dimensional (4D) representation It exists in three planes or axes, x-axis, y-axis and z-axis along with the fourth dimension which is called time or space-time OR A 4D figure has length, width and height in the x-axis, y-axis, z-axis and time respectively.	
2 (b)	<u>Time-Based</u> - Good for creating animation. - Branching, user control, interactivity facilities <u>Icon-Based</u> - Clear structure-you can easily see how a title is structured, that is, the flow of a program and especially the branching. - Easily editing and updating <u>Card/Page-Based</u> - Easy to understand-one screen is equal to 1 card or 1 page. - Easy to use as these tools provide template. - Short development of time. <i>Accept any one advantage for each tool.</i>	J1 for each tool. Choose any one (1) for each authoring tool
2 (c)	Content: Offline: Permanent and not changeable Online: Can be change Robustness: Offline: Content remains as original Online: Content prone to damage and lost Accessibility Offline: Can be accessed without internet Online: Required Internet Capacity Offline: Can store high end multimedia element such as video Online: Limited in picture size and low resolution video Speed (data transfer rate) Offline: Fast/Relatively faster data transfer rate Online: Slow/slower/ Subject to the constraints of the viewer's Internet Service Provider (ISP) or network.	J2 for each authoring tool and example

	Ease of editing Offline: permanently stored/not editable Online: not permanent/editable	
3 (a)	Define database system Together, the data and the DBMS, along with the application that are associated with them, are referred to as a database system.	J2
3 (c)	LibreOffice Based Or MS Access Or <i>Accept any other suitable answer.</i>	J1 for each
3 (d)	Differences between file processing system and the database system How the data is store? File processing system: within an organization has its own set of file Database system: many program and users share the data in the database Who can access the data? File processing system: designed for single user. Database system: designed to hold much larger collections of organized information How much data can be store? File processing system: small amount of data Database system: large amount of data	J1 (Choose any two)
4 (a)	Define data dictionary Data dictionary is the repository of all data definitions in a database	J1
4 (b)	Text Number Decimal Date/time Boolean <i>Accept any two answers.</i>	J2 (choose any two)
4 (c)	cardinality relationship One-to-many Notaion: 1:M	J2
5 (a)	i. Define the Internet The internet is the global system of interconnected computer networks that uses the Internet protocol suite (TCP/IP) to communicate between network and devices.	J1

5 (a)	ii. Microwaves	J1									
5 (b)	Describe with an example, how GPS is used in daily life. To guide vehicles and equipment Example: It helps taxi driver to locate the client’s destination	J1									
5 (c)	Networking media that easy to install Twisted pair cable Coaxial cable	J2									
5 (d)	Describe two (2) advantages of network - Facilitates communications: via email, instant messaging, chat and online social network. - Share data and information: access data and information stored on the network faster and easier - Transfer fund: transfer money between account more easily. - Share hardware and software: save cost of hardware and software <i>Accept any two suitable answers.</i>	J1 for each (choose any two)									
5 (e)	Network adapter Switch/router	J1 for each									
5 (f)	repeater	J2									
5 (g)	<table><tr><td>i)x=Modem; Y=hub/switch/router</td></tr><tr><td>ii) twisted pair cable; microwave</td></tr><tr><td>iii) printer/ laptop/ any suitable answers</td></tr></table>	i)x=Modem; Y=hub/switch/router	ii) twisted pair cable; microwave	iii) printer/ laptop/ any suitable answers	J1 for each answer						
i)x=Modem; Y=hub/switch/router											
ii) twisted pair cable; microwave											
iii) printer/ laptop/ any suitable answers											
6 (a)	<table><tr><th>Types of search tools</th><th>Definition</th><th>Examples</th></tr><tr><td>Search engine</td><td>A program that finds web site web pages, images, video, news, map and other information related to a specific topic.</td><td>Google search, Yahoo search, <i>Accept any two suitable answers.</i></td></tr><tr><td>Subject directories</td><td>Classifies web pages in an organized set of categories, such as sports or shopping, related subcategories.</td><td>Yahoo directories, Google directories <i>Accept any two suitable answers.</i></td></tr></table>	Types of search tools	Definition	Examples	Search engine	A program that finds web site web pages, images, video, news, map and other information related to a specific topic.	Google search, Yahoo search, <i>Accept any two suitable answers.</i>	Subject directories	Classifies web pages in an organized set of categories, such as sports or shopping, related subcategories.	Yahoo directories, Google directories <i>Accept any two suitable answers.</i>	J1 for each definition J1 for each example
Types of search tools	Definition	Examples									
Search engine	A program that finds web site web pages, images, video, news, map and other information related to a specific topic.	Google search, Yahoo search, <i>Accept any two suitable answers.</i>									
Subject directories	Classifies web pages in an organized set of categories, such as sports or shopping, related subcategories.	Yahoo directories, Google directories <i>Accept any two suitable answers.</i>									
6 (b)	i. Social networking ii. Online news, reference, and information iii. Online education	J1 for each answer									
6 (b)	iv. Online communication v. Online entertainment	J1 for each answer									
6 (c)	i. Walker, A. (2009, November). Germany avoid recession. Retrieved from https://www.bb.com/news--12 <i>Accept any suitable answer.</i>	J1									

6 (c)	ii. To show your reader you have done proper research by listing sources you used to get your information or To be responsible scholar by giving credit to other researchers and acknowledging their ideas or To avoid plagiarism by citing words and ideas used by other authors or To allow your reader to track down the sources you used by citing them accurately in your paper by way of footnotes, a bibliography or reference list. <i>Accept any Two (2) answer.</i>	J1 for each
6 (d)	i. Definition Censorship: Censorship is the suppression of speech, public communication or other information. This may be done on the basis that such material is considered objectionable, harmful, sensitive or "inconvenient".	J2
6 (d)	ii. Block the employee from accessing non-work related sites by some ISPs.	J1
6 (e)	i. Sign out/delete cookies/delete browsing history <i>Accept any Two (2) suitable answer.</i>	J1 for each
