

INSTRUCTIONS TO CANDIDATE:

Answer **all** the questions in the space provided.

Jawab **semua** soalan di ruang yang disediakan.

- 1 Multimedia is very useful to human beings. It can be used to deliver information to the user through various ways.

(a) Give **two (2)** types of multimedia.

[2 marks]

- (b) There are five elements in multimedia. Graphic is one of the multimedia elements.

Give two type of graphic.

[2 marks]

- (c) Describe the suitable type of font for printed material.

[2 marks]

- 2 (a) Multimedia design is a type of art that integrates multiple forms of multimedia.

Differentiate among two-dimensional design, three-dimensional and four-dimensional design.

[6 marks]

		Two-dimensional	Three-dimensional	Four-dimensional
i	Shape (Geometry)			
ii	Dimension			

- (b) An authoring tool is a software that allows its user to create multimedia applications for manipulating multimedia objects. Give **three (3)** authoring tools and the examples. [6 marks]

Authoring Tool	Example

- (c) Compare **two (2)** differences between online and offline in multimedia delivery. [4 marks]

Online Delivery	Offline Delivery

3 Database is an organized collection of data stored and accessed electronically.

- (a) Define database system

[2 marks]

- (b) State **two (2)** examples of Database Management System (DBMS).

[2 marks]

- (c) Give **three (3)** differences between file processing systems and the database system.

[3 marks]

File processing system	Database system

- 4 (a) Data in a database has a definite hierarchy. Data hierarchy is the systematic organization of data, often in a hierarchical form. Give the definition of **Data dictionary**.

Define data dictionary

[1 mark]

- (b) List **two (2)** type of data.

[2 marks]

- (c) Based on the Entity Relationship Diagram below, identify the cardinality relationship and the notation between Mother and Child.

[2 mark]

- 5 (a) Network is a collection of computers and other hardware devices connected together so that network users can share hardware, software, and data, as well as communicate with each other electronically.

(i) Define the Internet.

[1 mark]

ii. Give **two (2)** types of networking media.

[2 marks]

- (b) The Global Positioning System (GPS) is a space-based radio-navigation system consisting of a constellation of satellites broadcasting navigation signals and a network of ground stations and satellite control stations used for monitoring and control.

Describe with an example, the way Global Positioning System (GPS) is being used in daily life.

[2 marks]

- (c) Identify **two (2)** most common types of wired networking media that are easy or fairly easy to install.

[2 marks]

- (d) Describe **two (2)** advantages of a network.

[2 marks]

- (e) Ali needs to access the internet using his PC (Personal Computer) in his bedroom. However, the modem is far away from his bedroom. Therefore, the wired networking media is not an option.

Give **one (1)** network device should be installed in his PC and modem so that his PC are able to be connected to wifi?

[1 marks]

- (f) Ali's bedroom is far away from the modem. Therefore, the Internet signal is weak.

Describe the way to increase the Internet signal and give reason?

[4 marks]

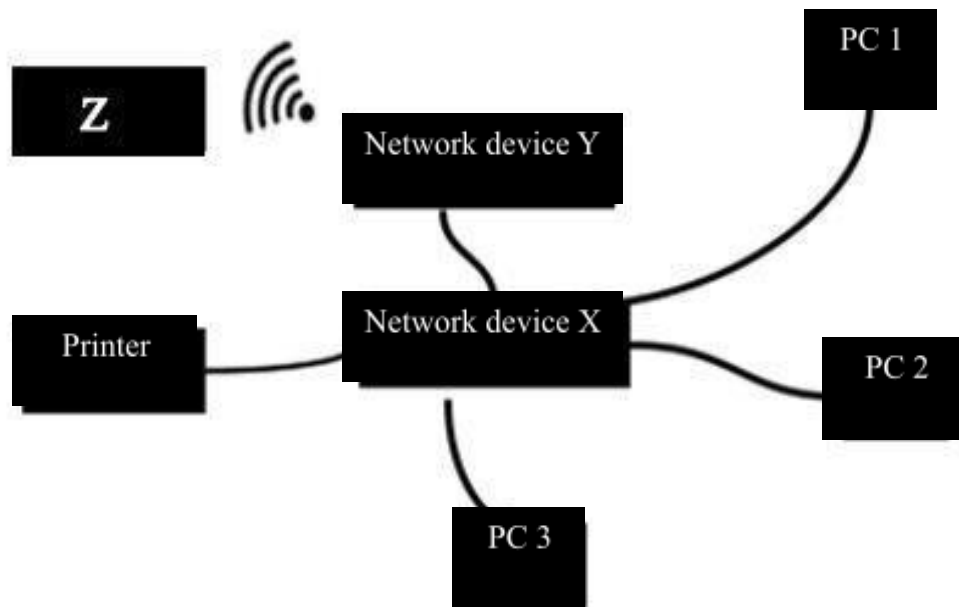

Figure 1: Network activities

- (g) Based on **Figure 1**, answer the following question.

- (i) State the name of network device X and network device Y.

[2 marks]

Network device X: _____

Network device Y: _____

- (ii) Give **two (2)** possibilities of devices for Z.

[2 marks]

- (iii) List **two (2)** type of networking media used in Figure 1.

[2 marks]

(iv) Give **one (1)** possible example of networking media for network device X to PC 2.

[1 marks]

6 The Internet is a massive network of networks. It connects billions of computers together globally. A search tool is a program to locate the information on the Internet such as news articles, maps, people, music files, image files, and videos.

(a) State the example for each searching tool.

[2 marks]

Types of Search Tools	Definition	Example
Search engine		
Subject directories		

(b) Web activities include online communications, social networking/social media, online news, reference and information and also online education.

Fill in the blank in the following table.

Name the type of web activities for the given examples.

[3 marks]

Types of web activity	Examples
i.	Instagram and Facebook.
ii.	The Star and BBC
iii.	D' LIMA and EPSA

iv. List **one (1)** other web activities other than 6 (b).

[1 marks]

v. Describe **two (2)** web activities that you have answered in 6 b (iv).

[4 marks]

- (c) A citation is a quotation from or reference to a book, paper or author, especially in a scholarly work. To avoid plagiarism, proper citation procedures should be used for all Internet content used in a paper, book, or on a Web site

Give **two (2)** importance of citing Internet resources.

[2 marks]

- (d) Data Privacy is the relationship between the collection and dissemination of data, technology,

(i)

Data privacy is the relationship between the collection and dissemination of data technology, the public expectation of privacy, and the legal and political issues surrounding them.

Define censorship.

[2 marks]

- (ii) Give **two (2)** examples how censorship can be conducted by employers.

[2 marks]

- (e) Internet of Things (IoT) refers to the collective network of connected devices and the technology that facilitates communication between devices and the cloud, as well as between the devices themselves. You have signed in your email in a personal computer in a cyber cafe to check your mail.

Give **two (2)** things you should do to ensure your privacy is being protected before leaving the computer to the next user.
