

Name : _____

Class: _____

Matric No : _____

1. Dila works as an Instructional Designers (ID) at MyElearning Incorporation. She needs to develop an interactive courseware for a 6-year student at private school.

- (a) State **two (2)** suitable multimedia elements, which Dila should include in her courseware.

[2 marks]

- (b) Describe the importance of both elements mentioned in **1(a)**.

[4 marks]

Multimedia Element	Description
Element 1:	
Element 2:	

2. (a) In the pre-production phase, determining a suitable multimedia application representation is crucial for a multimedia project.

- (i) Identify the types of design based on description below

[2 marks]

Description	Type of Multimedia Application Representation
Most commonly used in e-learning and exist on both the x- and the y-axes.	Type A:
Exist on the x-,y-axes and the z-axes with the addition of time dimension.	Type B:

- (ii) Based on question 2(a), **Type A** is considered as a less fascinating multimedia product to watch compared to **Type B**. Explain why. [2 marks]

- (iii) Differentiate between the type of multimedia design below [2 marks]

Multimedia element	Comparison
3D medium size vector graphic or image	
3D one hour duration animation movie	

- (b) There are basically three types of authoring tools, but nowadays most of these three types are combined into one authoring tool.

- (i) Name and describe **one (1)** characteristic for two types of the multimedia authoring tools shown in **FIGURE 1**.

[4 marks]

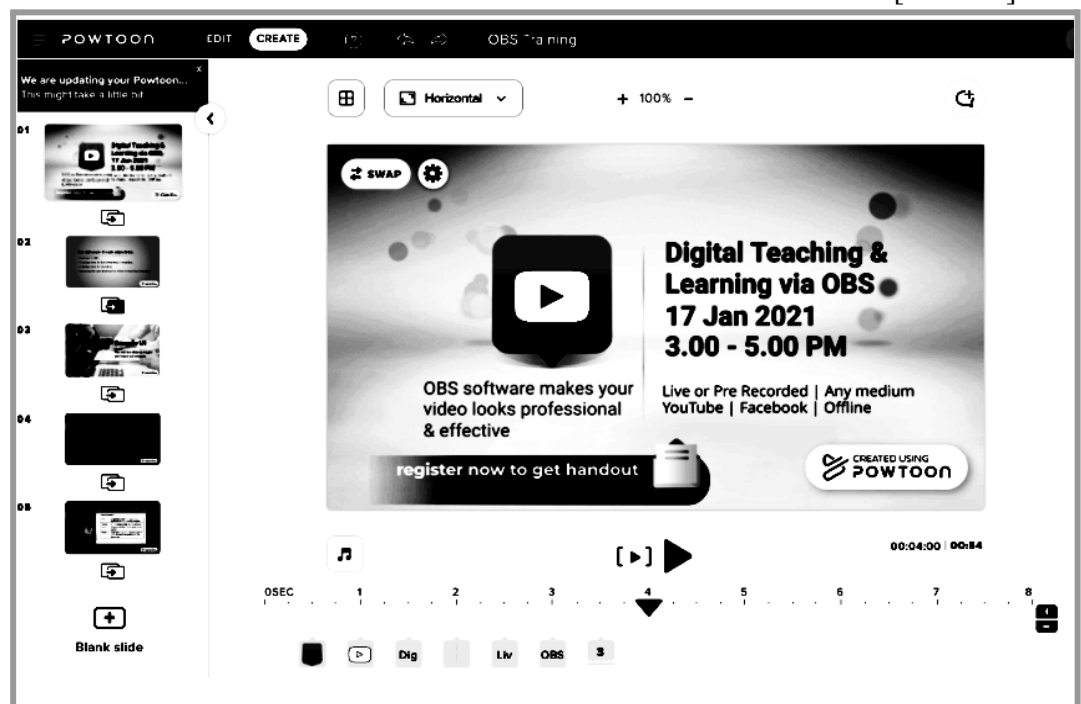

FIGURE 1

Authoring Tool	Characteristic
Type A:	
Type B:	

- (ii) Navigation is the outline of the connections or links among various areas of your content and helps you organize your content and messages.

Identify the **two(2)** types of navigation usually used in a website.

[2 marks]

- (c) Multimedia delivery is important to distribute the content of education.

- (i) State **two (2)** types of multimedia delivery option

[2 marks]

- (ii) Based on question **2(c)(i)** choose one option you prefer and justify your answer.

[2 marks]

3. Databases are very significant for every major field such as science, technology, business and others.

(a) Explain the concept of the database system.

[2 marks]

(b) Describe the advantages of using a database system compared to a file processing system.

[2 marks]

(c) Identify the component of database system based on description below

[2 marks]

Description	Component of Database System
i) The instructions and rules that govern the design and use of the database system	
ii) The raw material from which information is generated	

4. Data in a database system has a definite hierarchy and integrity.

(a) Explain the importance of data integrity.

[2 marks]

(b) Identify the database object based on the description below.

[2 marks]

Description	Database Object
i) A window on the screen that provides areas for entering or modifying data in a database	
ii) A request for specific data from the database	

5. (a) Describe the several uses of network below

(i) Global Positioning System (GPS)

[2 marks]

(ii) Video conference

[2 marks]

(b) In a network, computers and devices connected together via transmission media or network media.

(i) Explain what is network media?

[2 marks]

(ii) Identify type of network media that carries signal through substances without physical material on a network

[2 marks]

(iii) State **two (2)** examples of networking media in question **5(b)(ii)** that is appropriate for home network

[2 marks]

(c) (i) What is a network device?

[2 marks]

(ii) Name and describe the most appropriate **network device A** in **FIGURE 2**.

[2 marks]

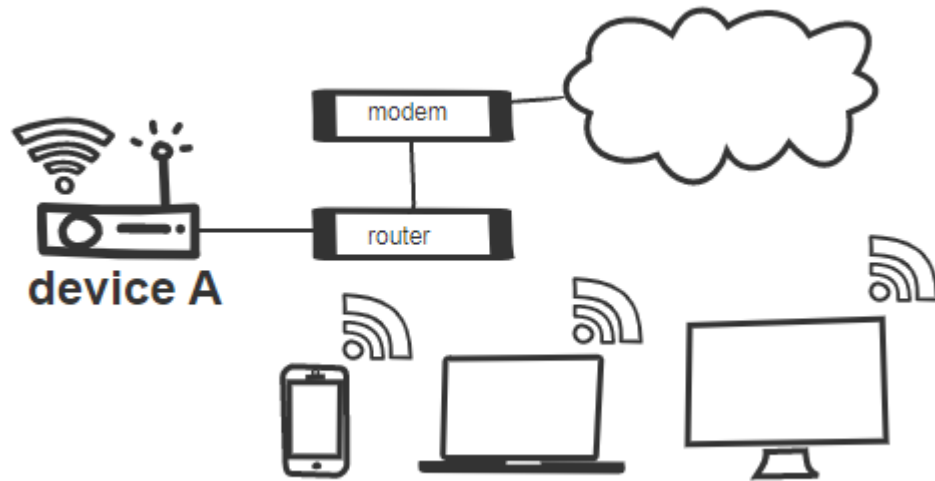

FIGURE 2

(iii) What is the most appropriate network device to replace **network device A** if a laptop does not have wireless capability and has to use wired instead?

[2 marks]

(iv) State **two (2)** network devices other than modem, router and **network device A** in **FIGURE 2**.

[2 marks]

6. (a) Identify the type of search tool based on the description below.

[2 marks]

Description	Type of search tool
(i) The search result is displayed based on hits or popularity	
(ii) The search result is displayed based on categories	

- (b) Search operators can help to refine search results.

- (i) Describe the advantages of using **phrases with search operators** instead of using only phrases while searching information.

[2 marks]

- (ii) State **two (2)** examples of using search operators in searching information.

[2 marks]

- (c) Differentiate between **two (2)** types of web activities and give **one (1)** example of the web activities below.

[6 marks]

	(i) Instant Messaging	(ii) E-commerce
Description		
Example		

(d) Information privacy is important to protect us as individuals or businesses.

(i) Describe **two (2)** ways to safeguard our personal information.

[2 marks]

(i) Explain the importance of safeguarding our personal information.

[2 marks]

(e) The Fourth Industrial Revolution (4IR) is a new and emerging technology distinguishing it from previous industrial revolutions.

(i) What is the relationship between 4IR and Internet of Things (IoT).

[2 marks]

(ii) Discuss **one (1)** example of the Internet of Things (IoT) that is used at home.

[2 marks]
